

Magnetic fields: competencies self-assessment

Power Smart for Schools

Name: _____

Date: _____

Use this form to assess your learning in this activity. Check off whether you consider yourself to be Beginning (usually need support), Developing (sometimes need support) or Consistent (able to do it independently) in each Competency.

Competency	Beginning	Developing	Consistent	Comments
Questioning and predicting				
Identify questions about magnetism				
Makes predictions about their findings				
Planning and conducting				
Make observations and record data using scientific language and representations				
Follow safety guidelines in your investigations				
Work collaboratively in a small group				
Processing and analyzing				
Explains the relationship between magnetism and electricity
